

Using R as a Research Tool Part 2:

Advanced Exercises

November 5, 2019

- Create a slideshow instead of an HTML document.
- Create a Sweave/LaTeX document instead of an HTML document.
- Reduce the number of significant figures in the inline results.
- Fix the scientific notation in inline results.
- Remove the headings in the figure legends.
- Format the plot area to get rid of the default grey background.
- Add figure captions (see RStudio CheatSheet) and find a solution to refer to a Figure within the text. For example:
 - "There was no difference between variables A and B (Figure X)", where X will refer to the correct figure number in the text.
